Cabbage

The Yellows Disease in Cabbage is responsible for the failure of many acres of this vegetable every year. This disease is prevalent from southern Wisconsin to the Gulf of Mexico and from the Atlantic to the Rocky Mountains.

For many years scientists of the University of Wisconsin and others have labored to find a remedy until we now have several varieties which are practically immune to this disease, or properly called Disease Resistant. The varieties offered below are all disease resistant. We recommend them as worth while to grow.

	Oz.	¼ lb.	Lb.
Iacope. Selected from Copenhagen Market. A splendid early sort for diseased soils. Heads are round, stem short.	$1.25	$4.25	$16.00

Bugner Winter. This is the variety for Winter keeping. Color dark green. Heads drumhead shape, weighing from 8 to 12 pounds. Our stock is excellent, due to continuous selection	.75	2.00	7.00
Red Hollander. For those who have trouble growing Red Cabbage, this is the kind to plant for late Summer and Fall crop. Heads are ball shaped and solid	1.25	4.25	16.00

Notice!

We call your attention to the fact that the disease resistant varieties differ somewhat from the sorts from which they have been selected. This difference is chiefly in the color of leaves and heads, being a darker shade of green, which in our opinion adds to their appearance.

Insecticides and Spraying Materials

***Safe* For Everything Except Destructive Insect Pests**

Now your plants can be assured of positive protection against insects by using Sheps Plant Spray, perfected after five year's research. Most of the common pests can be practically exterminated when plants are young by thoroughly spraying the soil of the garden at least once a week, using half ounce of Sheps Plant Spray to one gallon of water.

Rids Infested Gardens, Too!

Sheps Plant Spray controls and kills both sucking and chewing insects including Aphids, Thrips, Green Flies, Red Spider, Mealy Bugs, Worms, Caterpillars and others. Sheps Plant Spray will not burn the tenderest plants. In fact, it is beneficial to soil, and keeps foliage in deep lustrous green health. **NON-POISONOUS** for human beings, birds, animals or pets.

Ready to Spray in 15 Seconds

Sheps Plant Spray is unusually simple to mix. Measure out the proper amount of the solution, adding four or five times as much water. After stirring for about 15 seconds, pour the mixture into the sprayer and add the required amount of water. It is then all ready to do its deadly work. No tedious and time-taking mixing—no soapsud solution.

Unrivaled Wax Beans

(See Page 4.)

Mr. Market Gardener:

There is one thing on which nearly all market gardeners agree and that is: They want the BEST SEEDS.

Experience has taught and common sense tells them of the importance of using the better grade of seeds to help produce a better crop of vegetables as these are worth more money than inferior goods.

Our experience is when we sell a man good things he will come back and get some more. It is therefore quite logical for us, as seedsmen, to be always on the lookout for the best and strive to supply old and new customers with the quality of seeds they demand.

We are happy to state that the number of gardeners depending on us for all their seeds, is increasing every year and this urges us on in our efforts to improve, wherever possible.

We respectfully solicit your order for 1929 and assure you it will have our prompt attention.

Call, phone or write as you like.
